

## **BFCHRJ - 125 – Agile Project Manager | Managed Services | Bahrain**

### **About the role:**

The main objective of the Agile Project Manager is to be part of and manage multiple teams which are focused on delivering customer-facing initiatives and technical projects.

The job holder must be highly organized, dynamic, adaptive to the project needs, and able to manage different activities simultaneously within an agile software environment. He/she will identify key business stakeholders, capture requirements, work with multiple vendors and stakeholders, and be driven by the desire to help others achieve results.

### **Your Responsibilities:**

- Set project scope, budget, schedule, and communication plans.
- Work with project teams to build epics and user stories using Scrum or Agile methodologies.
- Facilitate meetings, including daily stand-ups, sprint planning, and retrospectives.
- Address issues that hinder a team member's capacity to work.
- Foster good communication and teamwork within the team and maintain consistent communication with stakeholders.
- Identify, track, report, and manage project risks.
- Lead or facilitate requirements discussions.
- Work with application lifecycle management tools such as JIRA, AWS Developer Tools, and Azure DevOps.
- Manage projects on Agile or Waterfall types/projects.

### **About You:**

- A Bachelor's degree in a related field.
- Certified Scrum Master (CSM) or similar.
- Very strong English communication skills.
- Three years of Agile & Software Project Management experience.
- Experience in managing projects & backlogs in JIRA or a similar tool.
- Experience in working across the full Software Development Life Cycle.
- Ability to manage diverse teams and multiple priorities.
- Strong interpersonal skills, flexibility, and focus on results and outcomes.
- Experience influencing technical and non-technical teams to drive business outcomes.
- Experience working with business analysts to assist with requirements development, business transformation, goals definition, testing, and user acceptance criteria.
- A positive attitude and be willing to do what it takes to make the team succeed.
- Must be responsive and able to work under pressure with a strong sense of urgency.
- Must be responsible, organized, self-motivated, and able to work with limited supervision.
- Must be detail-oriented and possess strong problem-solving skills.
